NO.2020-08

[www.syic.com](http://www.syic.com)

# COMPANY INTRODUCTION

# 品質創造信譽 信譽保證品質

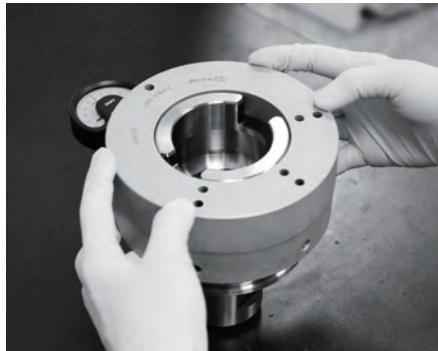

Quality creates reputation; reputation ensures quality.

## About SYIC

Established in 1979, SYIC is a professional manufacturer of precise tool holders, cutting tools, angel heads, boring series and collets with more than 500 employees. The taper types of tool holders we manufacture include BT (MAS403), CAT (ANSI B5.50), DAT (DIN69871-A), HSK (DIN69893), PSC (ISO26623-1), VDI (DIN ISO10889) and straight shank holders.

SYIC is certified to ISO9001 and ISO14001. With contribution to the design, production and sale of high accuracy and inventive products, SYIC has over 300 pieces of patents worldwide. SYIC keeps investing in high-end equipment and measuring instruments from Japan and Europe to implement excellent quality control and manufacturing capability.

SYIC keeps the core value "Quality creates reputation; reputation ensures quality" to impress our customers, possessing professional technical skills to provide comprehensive solutions for customers, improving customers' machining efficiency, and enhancing the mutual competitiveness with customers. Based on the mission of "Excellent service, supreme quality," SYIC will continue to launch more high precision products to customers.

# Tool Holders

Your reliable partner!

CNC turning, milling and grinding

[www.syic.com](http://www.syic.com)

# 供需平衡 共榮共存

Maintain the balance of suppliers and customers and grow together.

# 未來之路 無限寬廣

Create a great future with infinite opportunities.

# 營運獲利 永續經營

Run a profitable company with sustainable development.

# 合作到底 共創通贏

Keep everlasting cooperation and together create a win-win situation.

# 成就彼此 榮耀一切

Support each other and accomplish mutual success.

## Innovation is our mission!

SYIC is committed to developing high precision products to optimize the machining process and offering professional technical service. With experienced technical professionals, our products are developed in response to different types of industries. We aim to achieve customers' demands from different industries including machining industry, mold and die industry, aerospace industry, automotive industry, and energy industry. We offer the most professional and technical service, effectively resolve your machining problems to create maximum production efficiency.

# ATC ALIGNMENT TOOL SET

## Guardian of Machine Accuracy

Used for checking ATC positioning accuracy between ATC arm and machine spindle, and between ATC arm and tool magazine.

- ▶ Prevent tool holder tapers from abnormal wear.
- ▶ Detect the potential problems of machines and decrease the probability of machine breakdown.
- ▶ Prolong the use life of machine spindle.

### SBT

# INSTRUCTIONS FOR USE (SBT/SCAT/SDAT SERIES)

01

Clean machine spindle by spindle wiper.

1

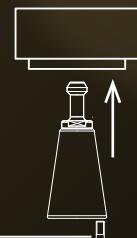

02

Assemble the taper adapter with pull stud and screw, insert taper adapter into spindle manually with screw and push machine controller button to clamp taper adapter, then loosen the screw.

M4x0.7P (#30)  
M6x1.0P (#40 & #50)

2

03

Install the flange adapter into gripper of ATC arm and press machine controller button to move ATC arm to align with machine spindle.

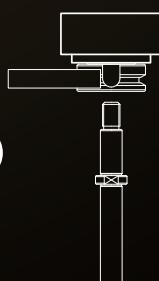

3

04

Insert alignment plug into the holes of flange adapter and taper adapter for alignment.  
If alignment plug can be inserted with ease and the movement is smooth, the alignment is done.  
If alignment plug can't be inserted into the holes of flange adapter and taper adapter, or it is hard to be inserted, please contact your machine supplier to inspect and adjust the positioning accuracy of ATC arm.

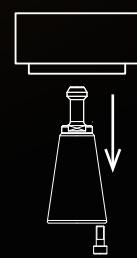

4

05

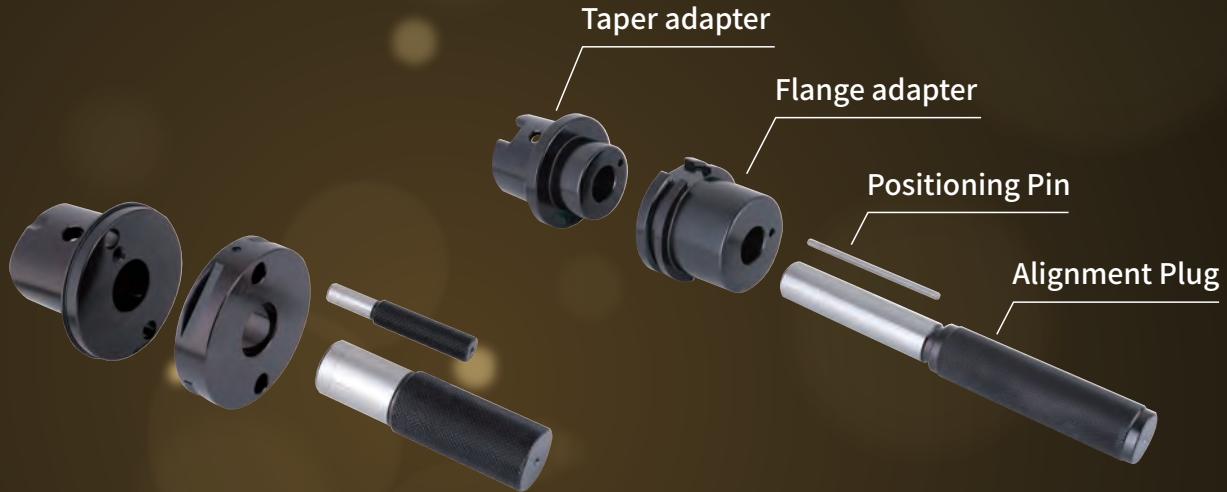

After completing alignment, unload alignment plug and flange adapter. Hold the taper adapter manually with screw and release it from spindle by pressing release button.

5

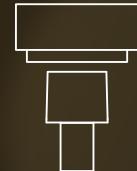

# INSTRUCTIONS FOR USE ( PSC & HSK SERIES)

01

Clean machine spindle by spindle wiper.

1

02

Insert the taper adapter into spindle manually and push machine controller button to clamp the taper adapter.

2

03

Install the flange adapter into gripper of ATC arm and press machine controller button to move ATC closer to machine spindle. Use positioning pin to adjust flange adapter to align position hole with taper adapter and spindle.

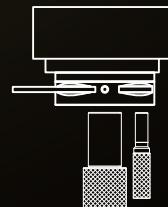

3

04

Insert alignment plug and positioning pin into the holes of flange adapter and taper adapter for alignment. If alignment plug and positioning pin can be inserted with ease and the movement is smooth, the alignment is done. If alignment plug and positioning pin can't be inserted into the holes of flange adapter and taper adapter, or it is hard to be inserted, please contact your machine supplier to inspect and adjust the positioning accuracy of ATC arm.

4

05

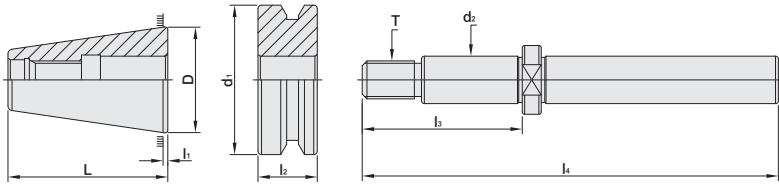

After completing alignment, unload alignment plug, positioning pin and flange adapter. Hold the taper adapter by hand and remove it from spindle by pressing releasing button.
