

FL 浮動絞孔刀桿

FLOATING REAMER HOLDER

- ▶ 搭配絞刀使用
Used with reamers.
- ▶ 建議使用高精度的ER筒夾(UP級、P級)
It's recommended to use high-precision ER collets (UP class 5 μ m & P class 3 μ m).
- ▶ 藉由浮動設計，自動補償刀具與工件的徑向偏移量，提升孔位精度，避免絞刀斷裂。
With its floating design, it automatically compensates for the radial misalignment between the tool and the workpiece, thereby improving hole accuracy and preventing reamer breakage.
- ▶ 最大轉速:2,000RPM
Max. revolution: 2,000RPM.
