

Compensation for Inaccuracy

Better Tap Use Life

Coolant Through

STA SYNCHRONIZED TAPPING HOLDER

▶ BT / SBT, CAT / SCAT, DAT / SCAT, HSK and PSC are available.

▶ Modular design: tap holder body with adapter is modular design, lowering purchase cost.

▶ The special structure design provides compensation for the axial inaccuracy when tapping, improving tap quality.

▶ If interference occurs, longer adapter can be custom made.

▶ Can be used for coolant-through taps.

▶ The tap use life is increased by at least 2 times compared to traditional tapping system.
